

Hey guys!

The battlements should be 280mm long.

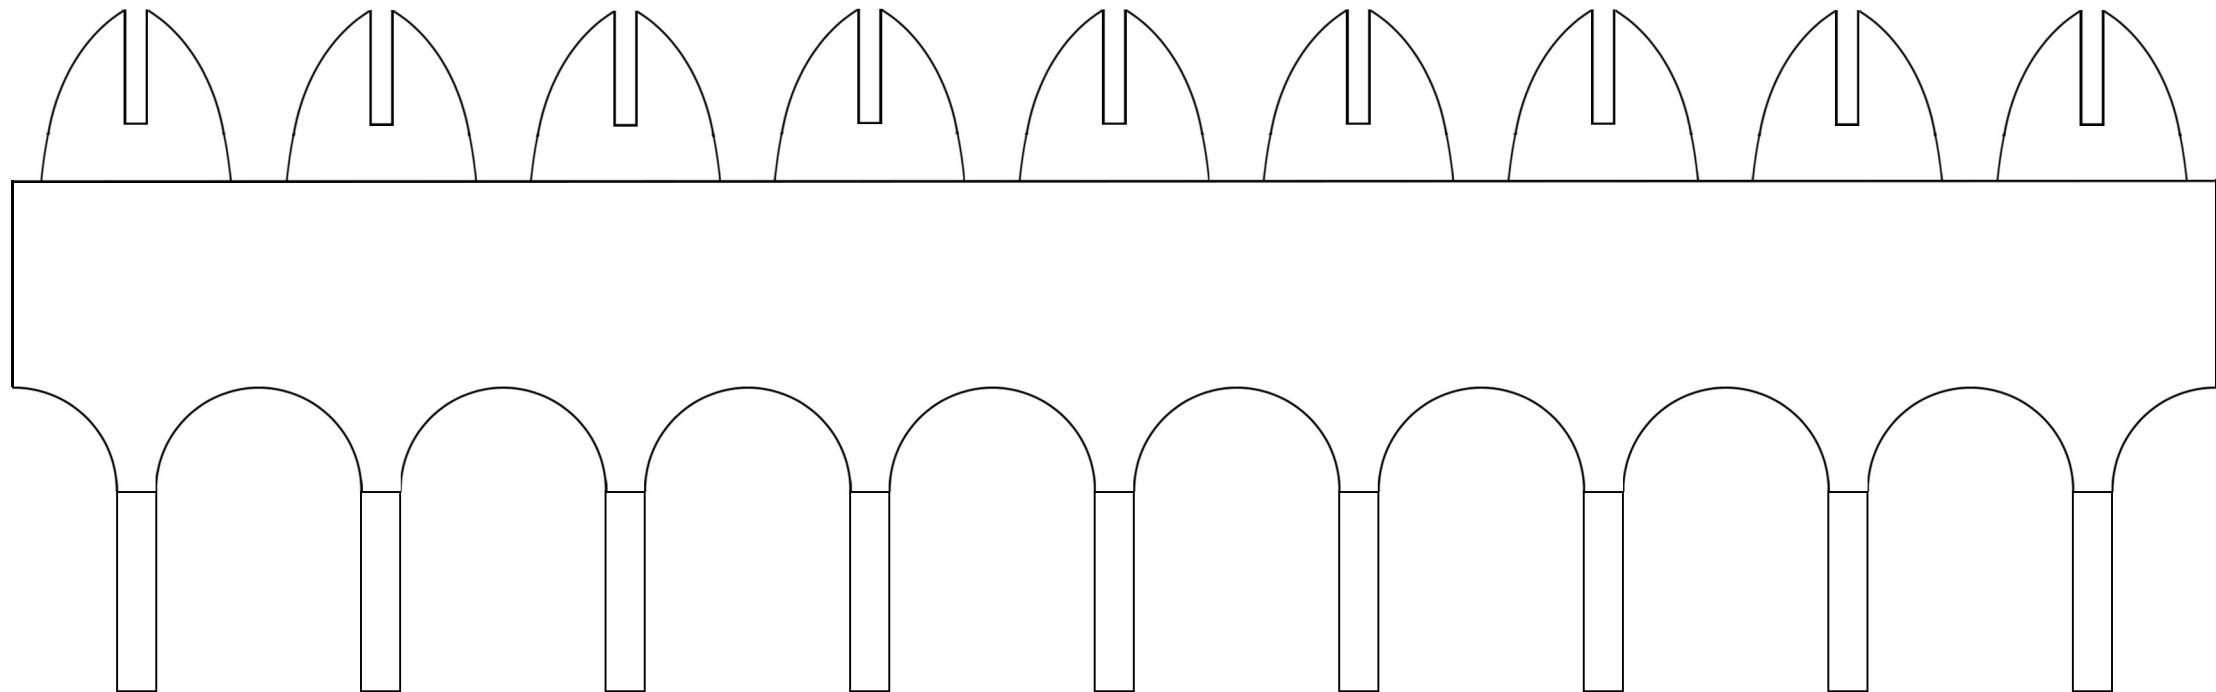

I've updated this template to have two versions. The first an original one is slightly over-scaled to help compensate for older printers which have a crop factor based on the margins.

The second is true scale 280mm. This means if your printer crops in the battlement will be less than 280mm.

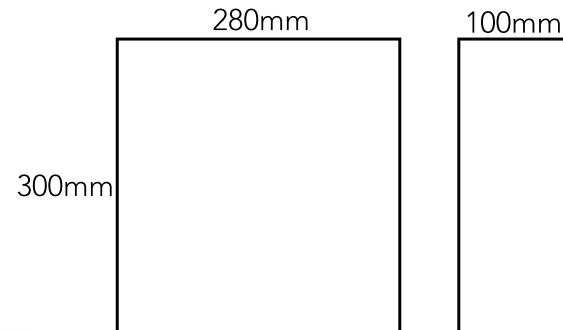

Test out both with your printer and see which prints correctly. If neither come out as 280mm long you may have to tweak the scaling settings by a few %.

Cheers guys!

# Outer Wall Battlements

## Wall Dimensions

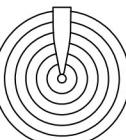

This template is to be printed on A4 and the battlement should be 280mm long when printed.
